A moment of meeting on the innovation of the design of light.

The 2017 edition of the conference is inspired by the recent award of the Nobel Prize in medicine to Jeffrey C. Hall, Michael Rosbash and Michael W. Young for their research on the molecular mechanisms controlling the circadian cycle. Since many years, the influence of light on human beings has been very important in the lighting discipline and in the design of lighting products.

As part of this thirteenth edition of Lighting Innovation, there will be lectures by teachers, professionals and manufacturers, and a panel discussion of future scenarios of the design of circadian lighting.

The convention is held in Italian with direct translation in English.

Participation is free with registration **within the 26/11/2017** by filling out the form (<https://goo.gl/pBj6mx>) on the website of Laboratorio LUCE (www.luce.polimi.it).

Lighting Innovation takes place in the framework of the **Master in Lighting Design & LED Technology**, patronized by: AIDI, APIL, ASSISTAL, ASSOCIAZIONE ITALIANA COLORE, ASSODEL, ASSOLUCE.

PROGRAM

Moderator

Silvano Oldani - Director of LUCE magazine (AIDI)

09.00 - Registration

09.30 - Welcome and opening greetings

Silvano Oldani

09.45 - Illuminazione circadiana: fondamenti scientifici e tecnologici

Maurizio Rossi - Politecnico di Milano

10.15 - Applicazioni di illuminazione circadiana in ambito ospedaliero

Paola Bertoletti

10.45 - Break

11.00 - More than vision

Piergiorgio Ceregioli - iGuzzini

11.30 - Nuove prospettive per la progettazione del sistema luce

Fabio Zanola - Artemide

12.00 - Panel discussion by **APIL**

Susanna Antico (APIL president), **Marinella Patetta**, **Silvia Perego**, **Bianca Tresoldi**
