SUBSCRIPTION FEE

Cost of the course (8 hours) is 150 € + IVA (22%).

For registration details and more information about the content, please contact the Secretariat. Discount of 10% for the members of APIL (Italian Lighting Professionals).

LANGUAGE

The course will be held in Italian language with direct translation in English.

TARGET

The course is intended for technical graduated and non graduated professionals, engineers and architects.

DESCRIPTION

Introductory course to the independent profession of Lighting Designers. The course aims to provide the tools to start a professional career in the field of lighting, so it includes both issues closely related to the professional practice and the lighting market.

CONTENT

Topics that will be covered during the course:

- Photometric fundamentals
- Outlines about the internal and European market
- Necessary tools to deal with the profession: the designer - entrepreneur
- Contents of the project in case of a LED installation (CIE TR205 / 2013)

- Professional services according to the budget
 - Criteria for the definition of a professional assignment
 - The relationship with the customer
 - The production chain of lighting and the relationship with companies
 - Criteria for the definition of a tender and a final cost
 - The lighting time schedule and its link with other work development
- At the end of the course participants will receive an attendance certificate.
